**How to Transfer a Tracing**

Use an HB pencil to trace your sketch onto tracing paper. Next, make your own 'carbon paper'. Take a sheet of thin layout (or typing) paper, and with a 2B pencil heavily shade an area large enough to cover your whole sketch. Place the shaded side down on the paper to which you want to transfer your sketch. Place your traced drawing on top of this and re-draw over it, pressing firmly with a hard pencil (a 6H is best) to transfer it to your painting paper.

### How to make a Viewfinder

A viewfinder is an invaluable resource, designed to focus students' attention on a specific area of an object, picture, pattern or scene.

**You need:** a sheet of black card, a good knife, two big paper clips and a ruler.

Use the ruler and the knife to cut two equally shaped L pieces of the card. We recommend 20cm for the arms – you can always shorten them later. Make the L shape about 5cm.

Use the two big clips to join the two L-shapes together so they form your frame. Adjust by sliding the L-shapes horizontally or vertically until you find the composition you like.
