

Furniture Essentials

2016/17 SOLUTIONS FOR LEARNING ENVIRONMENTS

Wayne Jamieson
Sales & Marketing Manager

The essence of providing furniture solutions continues to change and evolve. Furniture should always play a part in providing critical support to learning. Its ultimate purpose is to contribute to student success. To this end our new 2016/2017 catalogue again sees a number of new and innovative ideas. Furniture that is flexible, adaptable and mobile and encourages collaboration and group work and suits a variety of learning skills, styles and needs. We look forward to helping .

Acknowledgment

CES thanks the staff and pupils at Breens Intermediate Christchurch for their assistance with some of the photography in this catalogue.

Sizes and Colours

Details of desk and table top finishes, colours and correct desk and chair heights are listed on page 91/92/93.

Freight Policy

Our policy is to manufacture most furniture locally in Christchurch. However, some products are sourced from the North Island and a minimum freight charge may apply. Freight is charged at cost and covers packaging, delivery and insurance. Where practical, CES will supply product 'knocked-down' (C.K.D.) to save on delivery costs.

Delivery Times

Many items are ex-stock. However, standard delivery timeframe is four weeks except Sebel products, where a 6-8 week timeframe applies.

Warranty

All products carry a ten year warranty against faulty workmanship and materials.

Disclaimer

Product and product details were correct at time of publication of this catalogue and may be subject to change without notice. CES will not be held responsible for errors in printing, modification or deletions of products contained in this catalogue. In accordance with our pursuit for value for money products, we reserve the right to change specifications and brands without notice. CES will endeavour to supply the brand of product displayed in this catalogue. However, if unavailable, discretion will be used in supplying an alternative brand of comparable quality.

“ It is modern and it is colourful. It is good that we have the choice to move the furniture around. ”

CLAUDIA

Create great spaces for your students to flourish...

Create your own, customised, modern learning environment

Creating a modern learning environment requires you to understand the different learning styles of students – so no more rows of desks, no more uncomfortable chairs.

What's required is different learning spaces for students who learn in different ways, like:

CREATIVE – ideally there's low spaces, seat for individuals, but close to others – these students like to operate where they can see others and what they are doing.

LOGICAL – these students look for a space that suits the activity – group work means a big table to congregate around or a conference style space, whereas for project or study, they want to be alone, so maybe a booth.

INTERPERSONAL – for this learning style – as much interaction is as possible, so sitting facing each other in groups is the requirement for best results.

CONTROLLED – these are the organised, structured learning students – space of their own is important, they're in control and it keeps them from being distracted.

So it's not one size fits all any more, and that's where CES can help you create the environment so all your students can flourish and achieve their full potential.

CES has an exciting range of furniture and equipment that reflects a new way of learning and is attractive, flexible and your students and teachers will love working with it.

We can also create made to measure furniture to suit your individual school and learning space.

Projects

The way schools are furnished continues to change. Modern pedagogy places emphasis on collaboration, communication, creativity and adaptability. Furniture plays an important role in providing critical support to learning. Its ultimate purpose is to contribute to student success.

Furniture for learning spaces should encourage:

- Collaboration- planned and spontaneous
- Be flexible, mobile and adaptable
- Suit learning activity
- Meet physical needs of students
- Maximise the use of space and meet the budget
- Accommodate and integrate technology

CES can help. Contact Wayne at wayne@cessl.org.nz for ideas that will meet both your needs and your schools budget. The following PROJECT pages will give you some ideas for your own projects.

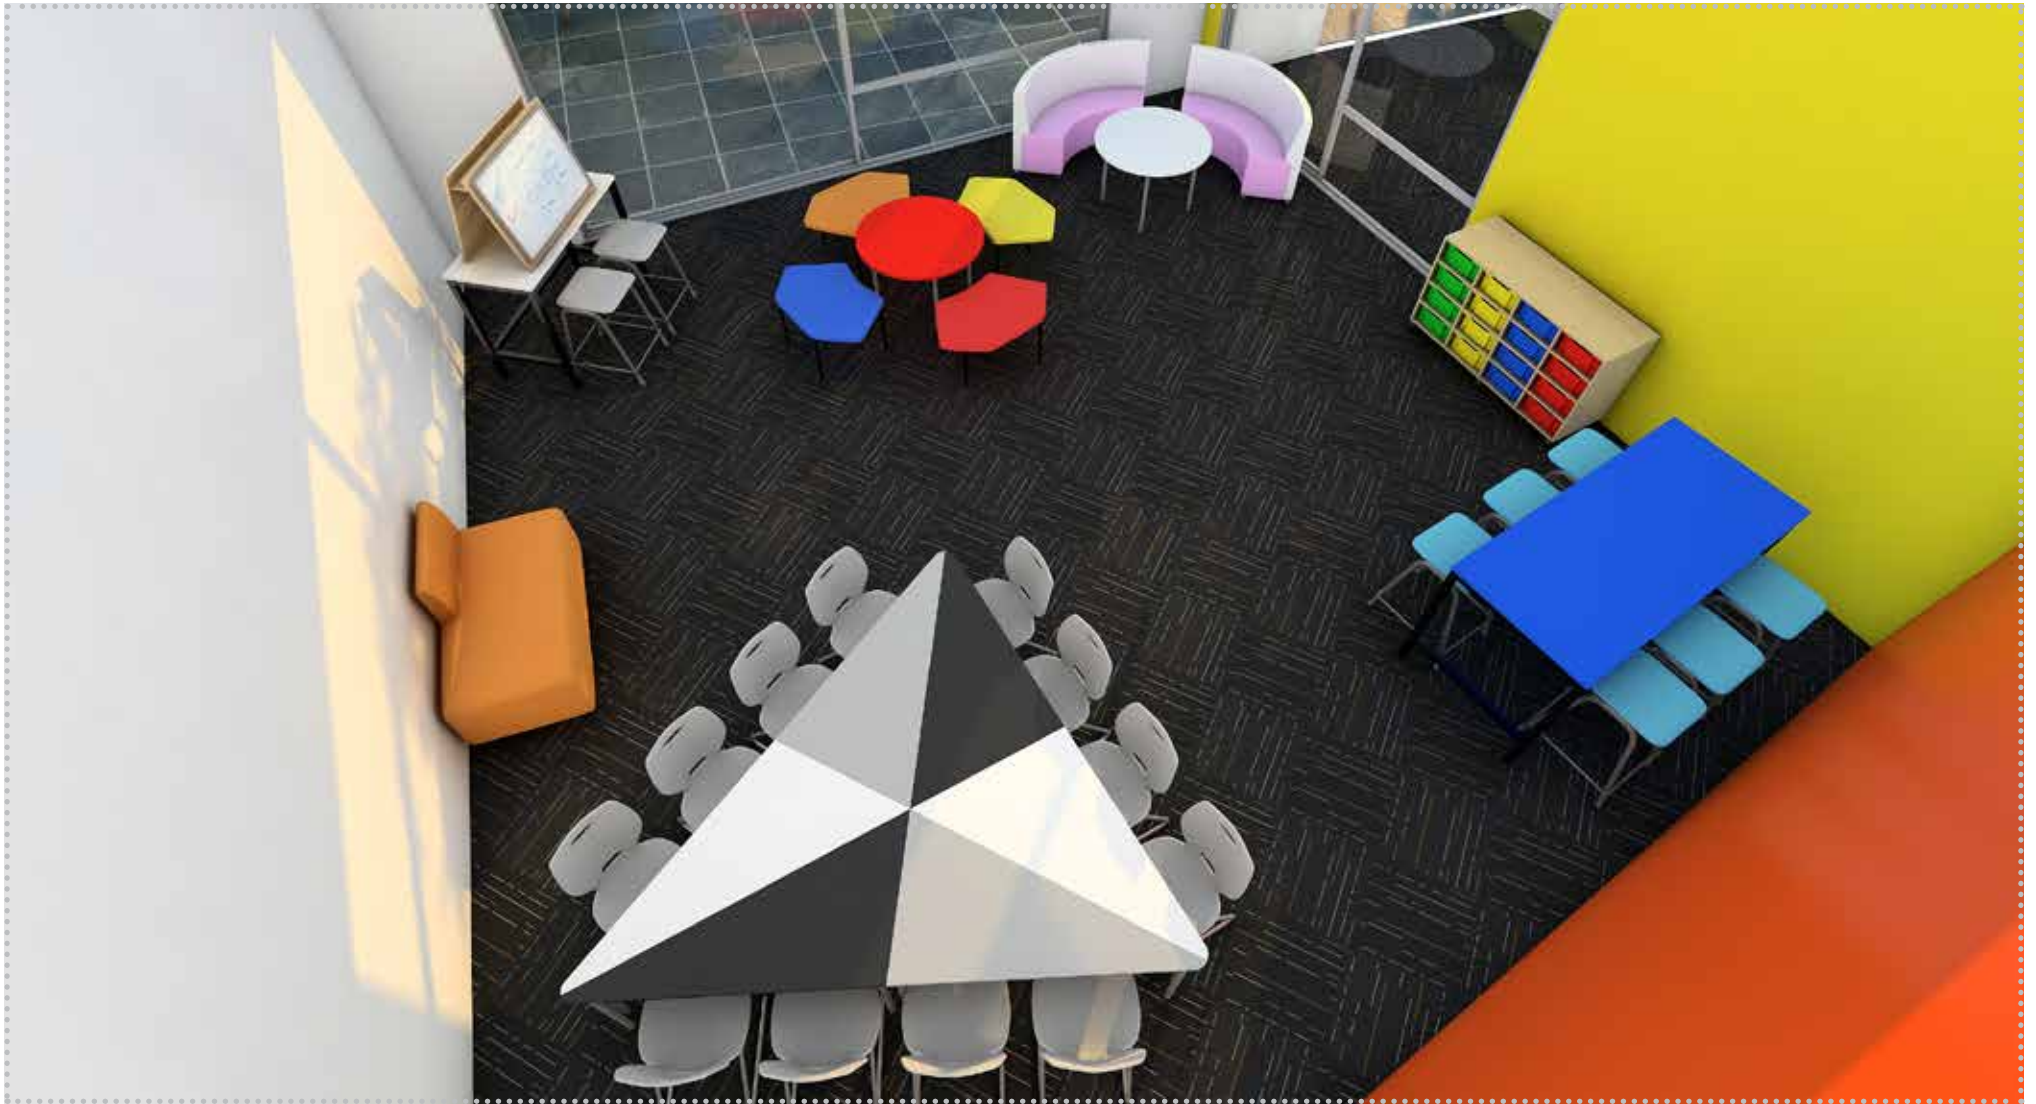

Open Learning Area A

- Each bench comfortably seats 4 adults
- Moulded from impact-resistant polyethylene
- Stackable
- Special grooves drain away water and add strength
- UV light-resistant
- Colours: Blue, Light Green, Red, Dark Green, Yellow, Orange

Melteca / Melamine

Melteca is a tough melamine surface laminated to superfine particle board of medium density fibre board (M.D.F). The resin on the top surface of the overlay cures, forming a tough, stain-resistant finish. Available in an excellent range of colours, patterns and finishes.

Formica

Formica is a high pressure laminate made from layer of resin-impregnated paper covered with a translucent overlay containing melamine. The layers are bonded under heat and high pressure. Formica is an extra-tough and extremely durable laminate for use in situations requiring surfaces that are resistant to scratching and staining, totally hygienic, and virtually indestructible. Available in a palette of over 230 colours and patterns in standard and decorative finishes.

Colours and Patterns

Melteca, Melamine and Formica colour charts are available for download on our website. Go to: www.cessl.org.nz

Edge Finishing

Edges of laminate can be finished using coloured edge tapes, ridge PVC, T-edges, solid timber clashing strips or direct platforming. Where the edges or corners are expected to take knocks, rigid PVC edges are recommended. The colour laminate you select will determine the edge colour. Other combinations are available by request as a non-standard order. Please contact CES for additional costs and lead time.

Refurbishing/ Supply of Components

CES offers a complete refurbishing service or we are able to supply component parts to your school. We can supply new table and desk tops, undertake powder coating, undertake reupholstering work. Call Wayne 03 338 4444 or email wayne@cessl.org.nz for further information.

Some Recommendations...

Consideration should be given to the choice of laminate for horizontal surfaces. CES offers two options: low-pressure laminate (Melteca and Melamine), or high-pressure laminate (Formica and Wilson Art). Low-pressure laminates are adequate for general, low-impact use. However, if desks or tables are to be situated in pre-schools, in areas where food and liquids are prepared and/or consumed, or where cutters or sharp instruments may be used we recommend the choice of high-pressure laminates for tops of tables and desks.

CES does not recommend dark colours or gloss finishes for high wear applications. Dark colours or gloss finishes require more care and maintenance than lighter coloured or lower gloss surfaces.

Table & Desk Heights

Recommended for:	
Preschool	530 – 610
Year 1 & 2	530 – 610
Year 3 & 4	590 – 635
Year 5 & 6	660
Year 7 & 8	710 – 735
Year 9+ adult	735 – 750

Chair Sizes – Height from floor to top of seat.

Recommended for:	4 Point	Nully Yuta	Durapos	sebel	Classic
Preschool	290	-	-	295/320	-
Year 1 & 2	290	345	330	335	345
Year 3 & 4	330	345	370	350	400
Year 5 & 6	370	390	410	370	400
Year 7 & 8	410	435	410	405	440
Year 9+ adult	460	435	460	445	440
