

Are you using Xero as your school's accounting software?

CES can help:

- Let us provide a quote for monthly assistance or an overview based on hourly, monthly or quarterly requirements for your school.
- Our accounting team are Xero certified, qualified and keen to assist your school – all at a very competitive price.
 - CES has developed a reporting suite using Xero especially for schools. A sample of those reports, which always include analysis at no extra cost, are attached. They can be customised to your particular requirements.
